

NEM Strategy 2017

Brussels, 11 May 2017

pierreyves.danet@orange.com

Work plan for the next period – Context&opportunities

In 2016, NEM community has updated the Strategic Research and Innovation Agenda. 14 sectors have provided inputs and 10 technical research topics have been identified.

This new SRIA had the objective to contribute to the Workprogram 2018-2020 of Horizon 2020.

Media, content and creative industry has been linked to the Next Generation Internet flagship in the workprogram 2018-2020 together with IoT and Artificial Intelligence.

NEM has supported 2 support actions at the last ICT41 call which have the objective to develop the NGI SRIA and the NGI program organisation.

In 2016, the EC has launched the Digitalising European Industry initiative which is also key to accelerate innovation development together with national clusters.

In 2018-2019, first trials of 5G will take place, there should be a place for one pilot addressing media&content (large event immersive program)

→ This year, NEM should begin to work on the next FP9 program which will take part from 2021 till 2027 taking into account this context.

NEM work plan 2017

WG1 : Contribution to the NGI flagship with our SRIA including I²C proposal

- To the NGI SRIA
- To the NGI program structure
- To the NGI ecosystem animation

WG2 : Contribution to the DEI initiative

- To the DIH catalog (NEM cluster of clusters)
- To the platform (Content&media platform)

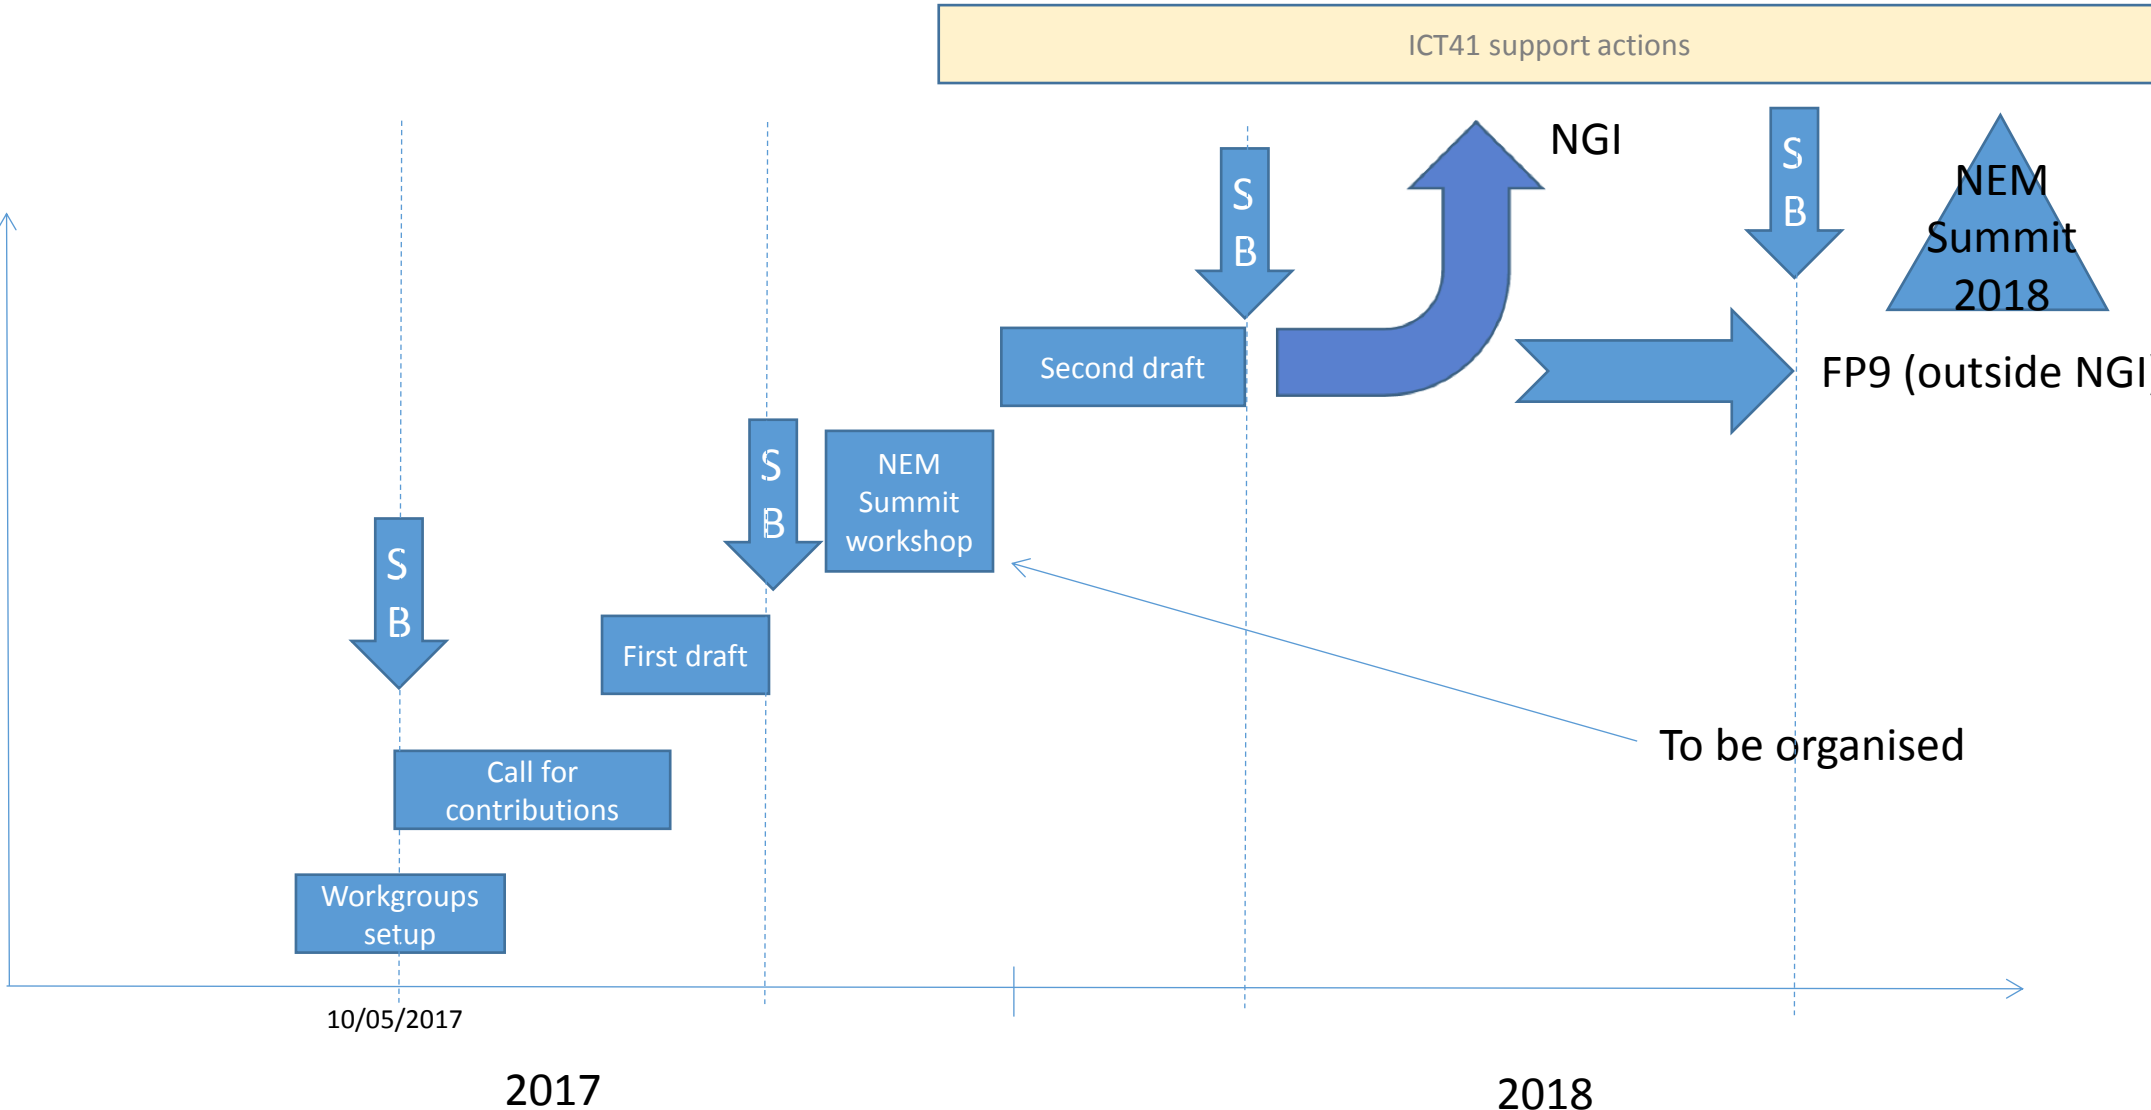

WG3 : Contribution to the 5G phase pilots

- Design of the media/content pilots able to validate 5G KPIs

WG4 : Contribution to the design of the next FP9 workprogram

- Design a vision at horizon 2025

FP9 NEM contribution timeline
