

**AI Digital Assistants are
facilitators of access to
verified information** 

Liliana Trif – Druid AI Sales Executive

druidai.com

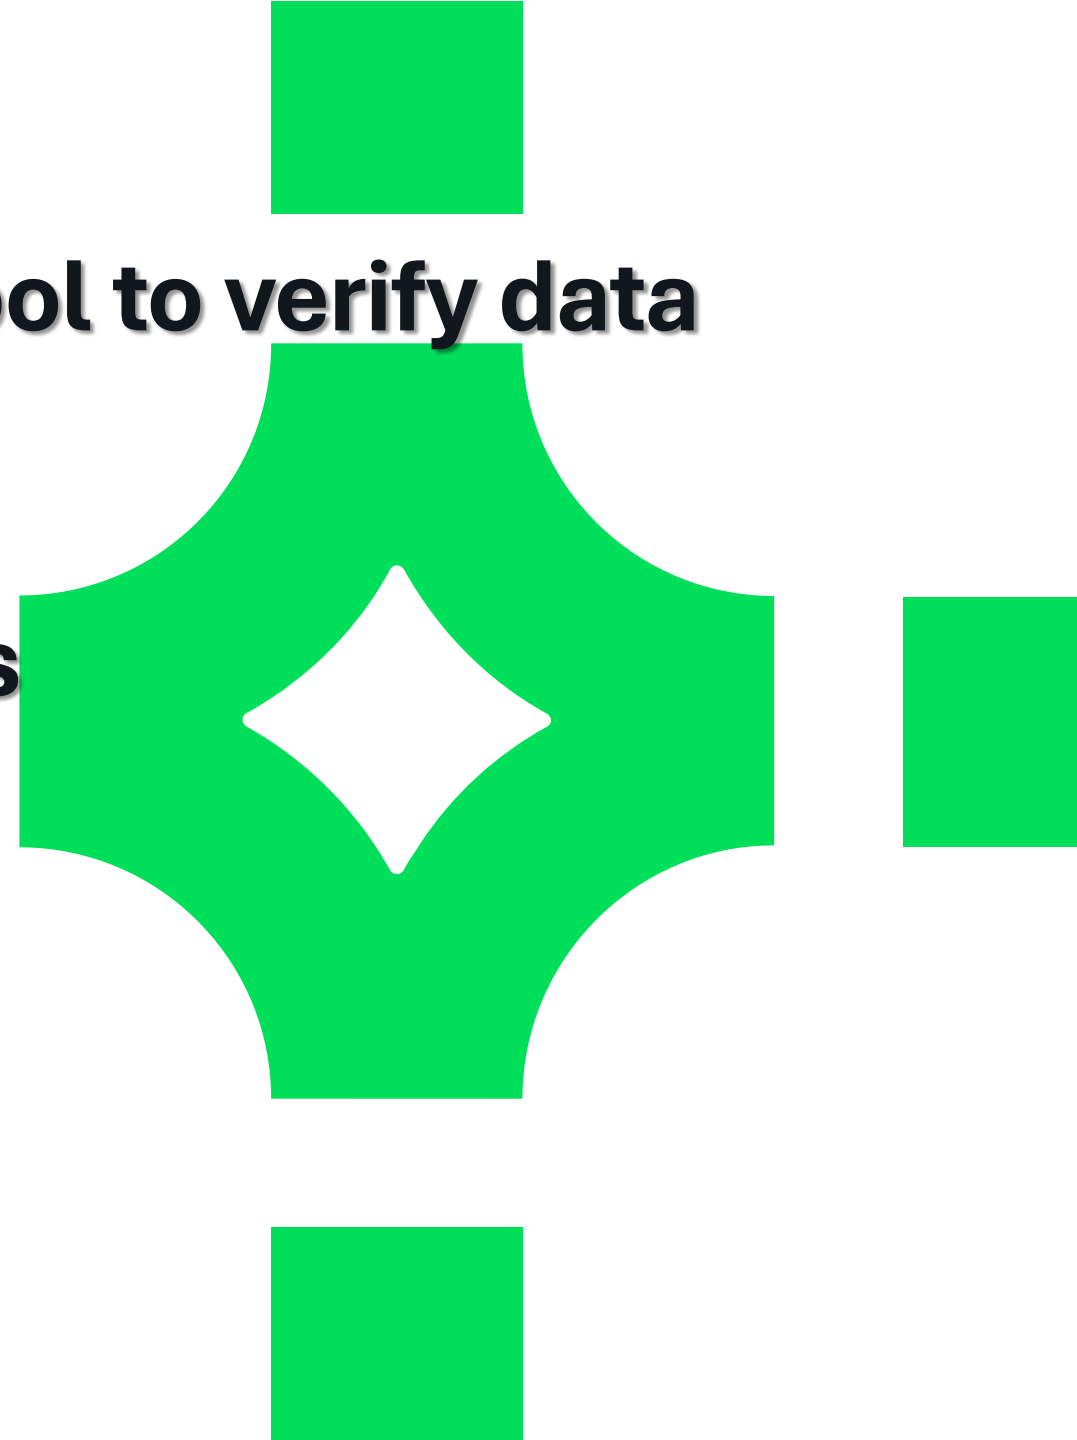

How can we create reliable reporting with AI to avoid disinformation on social media?

The Enterprise AI is a certified tool to verify data

**The sources of information
increase over the last 10 years
makes it mandatory to use a
framework for measuring and
verifying the Media Info**

The AI & Media are information facilitator Tools

AI technology, like Media, is an enabler for the access to accurate information with prior work done to verify:

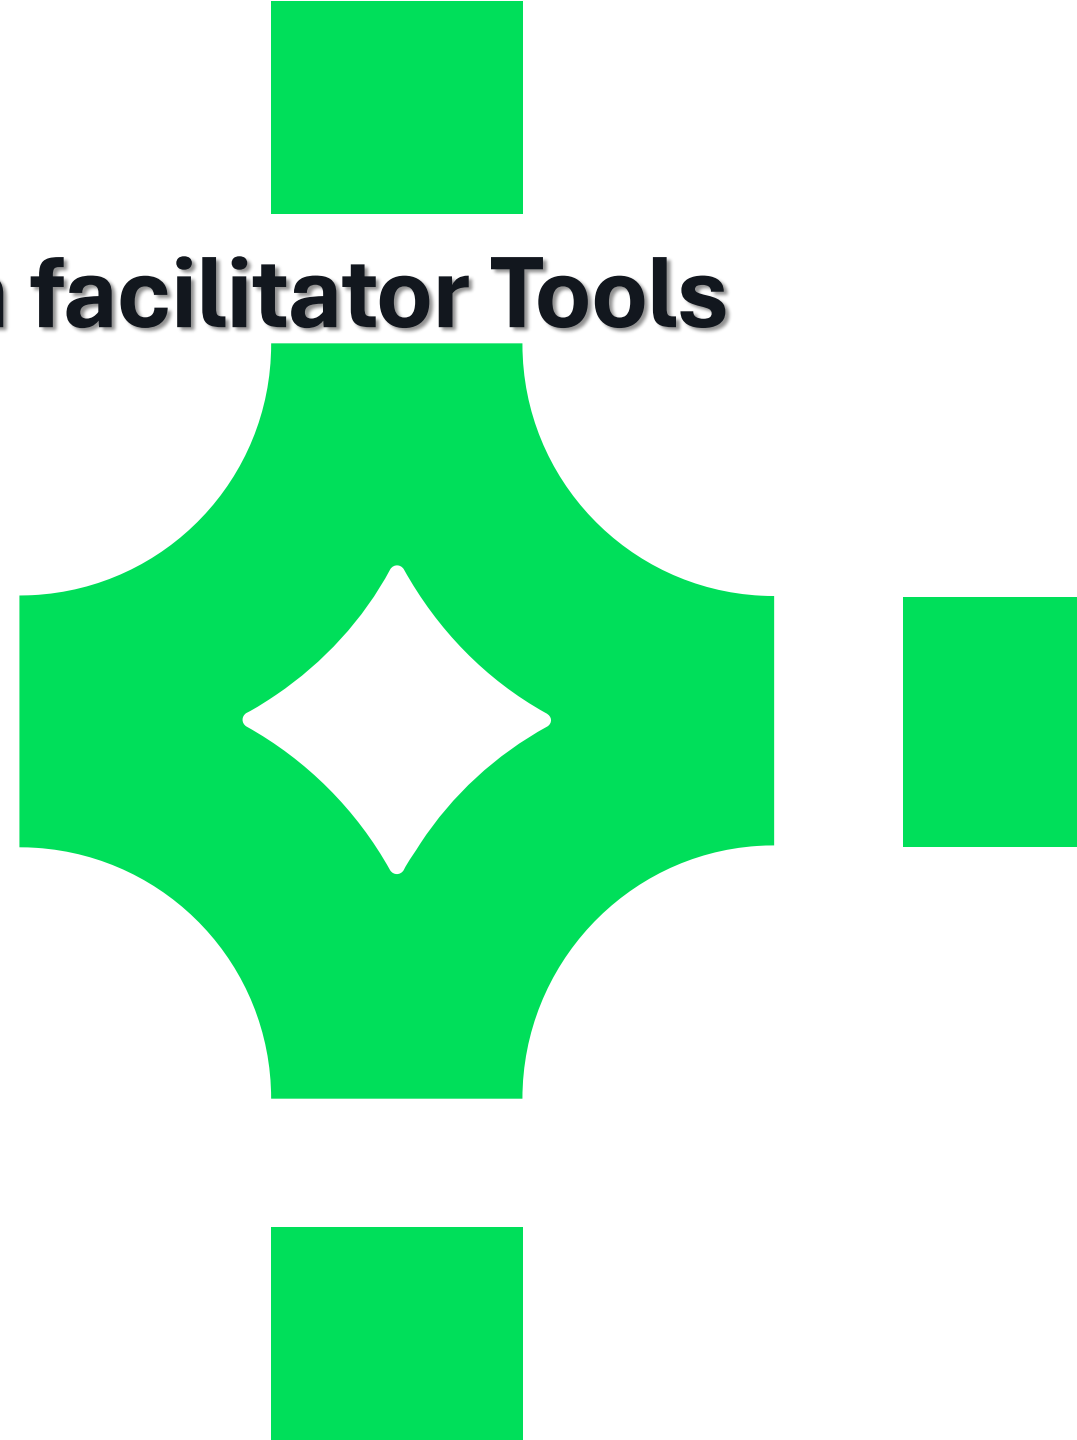

♦ **Sources & correct content**

♦ **Validate facts**

Exactly as a professional journalist does when writing an article:

✓ **By informing themselves & researching**

✓ **Cross-checking multiple info sources**

EU News Platform for the European Citizens powered by Enterprise AI

First Chatbot dedicated to European News

Launched on 1st of July 2025 in FR, EN, SP, IT, DE, RO&PL
ChatEurope is answering in all EU languages.

Guido Baumhauer, DW Managing Director Distribution:

"We are contributing Deutsche Welle's Plain X technology for seamless video translation and transcription, and we play a key role in evaluating the chatbot developed by DRUID to ensure it provides trustworthy, well-founded answers to users' questions."

"This project is an important experiment in creating interactive, reliable digital reporting on EU affairs."
